

# Ritbearing

## INTRODUCTION

## Customer Value Advantage

Ritbearing Corp., a proven leader offering wholesale bearing solutions, continuously focuses on improving customer value before and after the sale.

The Ritbearing Advantage Process program is a four-step process. The customer and Ritbearing meet to define achievable goals.

### Define Concerns

Define Areas of Concern for the customer:

- Cost Reduction
- Improvement of application
- Customer service
- Lead time
- Engineering Support

### Coordinate Solutions

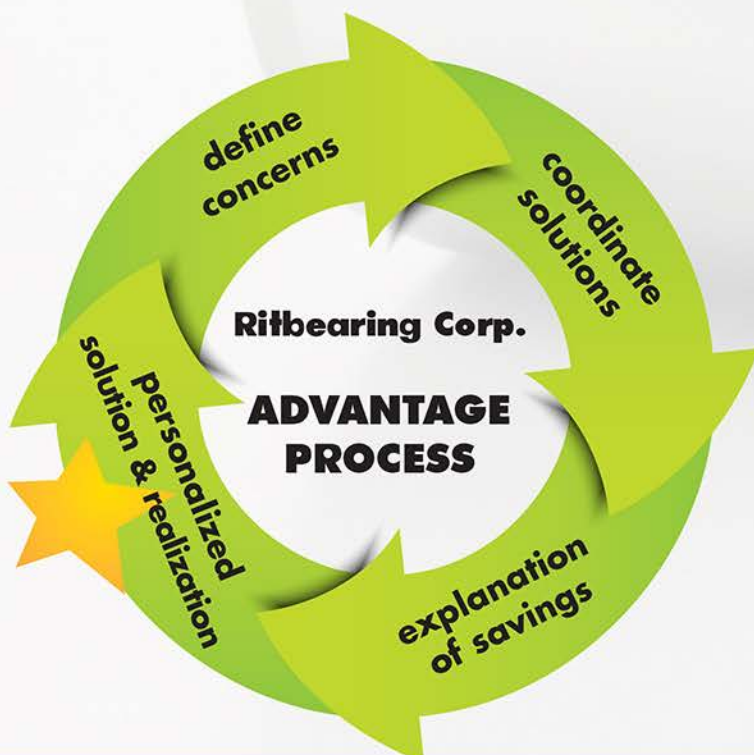

After careful review of the customer's areas of concern, Ritbearing's proven solution experts will bring into those requirements with the Ritbearing Advantage Process Program. Ritbearing and the customer highlight those areas and work together to coordinate a solution.

### Exploration of Cost Savings

Ritbearing works with its wide range of suppliers to identify a quality, proven solution that addresses the customer's defined areas of concern.

### Personalized Solutions & Value Realization

Ritbearing strives to continually educate and offer the market proven, customized solutions which reduce cost, improve application parameters and improve overall value.

- Schedule a meeting with one of our local sales team members for a visit.

## RITBEARING CORE BRANDS

Special engineered bearings and assemblies. Also produce slewing ring bearings and crossed roller bearings.

Produces and private brands for major Japanese companies. Japan's premier manufacturer of metric needle roller and cam follower, & miniature cam follower bearings. Engineered specials in both chrome & stainless steel.

Kashima Bearings, Inc., formed in 1961 has been specializing in plastic bearings for decades. Unlike those companies that rely on injection-molded plastics, Kashima's techniques allow them to craft what you need quickly and precisely via machining. The Kashima brand is UKB. It stands for "Ultimate Kashima Bearing." A wide array of plastic materials are available, allowing Kashima to offer the perfect materials that match the needs of the customer's unique application demands.

Produce specialized precision needle roller/ axial cylindricals for the machine tool industry. Also manufacture full complement cylindrical roller bearings for industries such as the steel & material handling sectors.

Former Steyr manufacturing and engineering personnel. Full manufacturing range: specialized in cylindrical & angular contact bearings. Production facilities in Austria, India, China, and Czech Republic. Engineered specials with focus on large bore products.

Produces components, finished products & private brands for major Japanese, European, and US bearing companies. 16000 (narrow width), 6000-6400 (metric), 62000-63000 (cartridge). Products available in Abec 5/ P5 precision class.

Specialty manufacturer of spiral bearings, multi-row cylindricals, & split water cooled roller bearings. Primary production on spiral bushing bearings (Eich Type) for steel mill applications.

Ritbearing China Bearing Division

Ritbearing Chinese Bearing Division. First-hand qualification of Chinese factory capabilities. Full range of manufacturing capabilities. Unground, semi-ground, and precision ground products. Fully automated, super precision manufacturing, machine tool bearings, kit manufacturing, private branding, and packaging experience.

Produces finished products & private brands for major Japanese, European, & US bearing companies. 6800-6900 (thin metric), 16000 (narrow width), 6000-6300 (metric), S6000-S6300 (stainless metric), 62200-63000 (euro width), 5200 (double row), R series, (inch) stainless steel guide wheel bearings.

Thin section manufacturing division of Ritbearing. Product is manufactured in Chino, CA and is DFARS compliant. Inch and metric sizes can be produced with a variety of materials including chrome steel and stainless steel. Coatings offered include thin dense chrome plating. Retro-fitting of cages and rolling elements are also available.

Joint venture with NTN-Taiwan. Large % of production is for NTN, special inch dimension bore, 600 (metric mini), 16000 (narrow width), 6000-6300, 6800-6900 (metric), needle roller bearings, 7000-7200 P4 (precision angular contact bearings), and Ball Screw Support Bearings.

Produces components, finished products & private brands for major Japanese, European, and US bearing companies. Spherical roller, cylindrical roller, tapered roller, needle roller, self-aligning, angular contact, and large bore ball bearings.

### Other brands offered:

# Ritbearing

Ritbearing is an importer and wholesale distributor of a wide range of ball and roller bearings. Our products are sourced and qualified from quality conscious bearing facilities throughout the world.

Ritbearing's goal is to offer our customers the highest quality bearing products at a competitive price on a timely delivery schedule.

Ritbearing Corp., an ESOP company, has facilities in Georgia, Ohio and California to service your bearing requirements. We have a strategically placed sales force to cover all areas of the United States.

Our efforts focus on educating our customers on products Ritbearing can offer, developing solutions to current and future bearing requirements, and securing long term relationships with our customers.

Our staff at Ritbearing looks forward to learning more about your company and serving your bearing needs.
